

Chummer6 Quickstart Guide

Created and owned by Chummer.

FlipLink can be an optional viewer; the Chummer page remains the source.

Chummer6 Quickstart Guide

Chummer6 is a campaign OS for building a runner, explaining the next rules decision recovering the table after the session.

Start

1. Open the current desktop release from the downloads shelf.
2. Finish first-launch install linking only if this device should stay attached to account.
3. Create a runner or open an existing workspace.
4. Use account and horizon rails only when the next job needs them.

What this guide is for

- ? install posture
- ? first safe actions
- ? public-safe Chummer orientation

What this guide is not

- ? a Shadowrun sourcebook
- ? copied rulebook prose
- ? a private campaign packet
- ? entitlement or payment truth

Document boundary

This guide is original Chummer content. Chummer owns the source document, version, policy, and release posture. FlipLink may present the approved PDF later, but it does not become the source of truth.
